

## Variance – Verteda Stock Solution

Dynamic real-time stock monitoring and management module through InfoGenesis® POS for food concessions & bars within business campus, sports arena and entertainment venues.

*A Cost-effective solution to accurately manage stock, quickly and productively in busy bars and food kiosks – in real time during service.*

Specifically designed and developed by Verteda for demanding hospitality environments, Variance through InfoGenesis is a powerful stock management system that accurately records and transfers stock items, manages waste and quickly reconciles inventory for operators in real time.

Optimised to operate on your InfoGenesis terminals and mobile devices means you can:

- Ensure the right stock levels at the right time, to meet demand – and avoid lost sales
- Improve business controls and enhance sales operations• Increase productivity and efficiency in your kiosks
- Improve customer service - stocking and serving the products that customers want
- Allocate sales in real time - transfers in and out in real time
- Allow for wastage, staff meals and other non-sales items
- Accurately and immediately reconcile your event, shift or day

Variance is delivering operational benefits at leading sports & entertainment venues, conference & exhibition centres, higher education & business campus environments.

### *Improved visibility – real-time insights*

Currently, many sites use transfer notes that are completed by managers which accompany products items to a concession stand or outlet. Operational staff count stock items to check what has been transferred, wasted or remains – with all outlets generating multiple transfer notes. This paper or excel based process is ultimately slow and managed by staff that are under pressure and who lack real-time business visibility.

Variance cuts through this unnecessary and inefficient complexity, removing the scope for human errors to improve speed, accuracy and management of stock.

## Verteda's Variance: working for you.

- Fast and easy to set-up and maintain.
- Optimised for fast paced hospitality environments.
- Seamlessly integrates with InfoGenesis Point Of Sale Solution.
- Delivers enhanced business visibility - improved stock and sales reporting.
- Helps you to monitor and eliminate fraud.

# Take control of your stock: get the right stock in the right place at the right time.

This web-based solution makes stock visibility, control and management across all of your concessions quick, accurate and simple: giving you new insights into your business, enabling you to make the right decisions to meet demand, satisfy customers and optimise revenues. Variance supports both simple product sets and more complex 'product trees'.

## Features

Web accessible solution that operates on a Windows terminal, integrated with InfoGenesis POS Solution, and available on mobile devices.

Real-time monitoring and investigations – eliminating fraud.

Allows variances at all stages of the sales process i.e. transfer, prior, during and end of day.

Reporting

Automated - digital

## Benefits

Managers can access the system easily via the web (i.e. on PC, tablet, smartphone) - so they can be on the floor during a shift or event and not be tied to the back office.

Variance enables stock transactions to be closely monitored from a fraud perspective, alongside InfoGenesis POS Solution that monitors fraud from a cash perspective – enabling real-time detection.

To ensure Managers can monitor stock movement throughout the course of an event or meal period.

Provides actual stock and stock variance reports online that can be easily exported for sharing e.g. via email – and stock management alerts.

Saves manual effort and eliminates inefficient and wasteful paper-based processes.
