

## Point-of-Sale Mobile Solutions: Point of service, anywhere.

Leverage Voyager 3 as a slim fixed terminal or use as a convertible point of sale system simply by removing the tablet from its base and going mobile. Waitstaff has all the tools they need to serve guests more efficiently while managers have access to administrative tools to ensure streamlined operations. For outlets where power is not accessible or space is limited, running InfoGenesis POS on a kiosk or in an area with a Windows® 8 tablet is an ideal solution.

*Verteda can offer you award-winning point-of sale solutions designed to help you serve your guests more effectively while enhancing your efficiency and profitability.*

Our system is easy to set up and maintain, and its scalable architecture enables you to add workstations without having to build out expensive infrastructure. The software integrates easily with a wide variety of other applications, and is designed to process transactions in the highest volume environments without any loss of performance at the point of sale. Rare offline capabilities allow the POS terminal to continue to perform well during intermittent server or network outages, synchronising data as soon as your network connection is re-established. Superior check management and on-floor reporting, along with consistent terminal configuration, pricing and screen setup, combine to give your frontline staff the tools they need to provide exceptional guest service across your entire organisation. Item images on buttons make ordering fast and easy. With InfoGenesis POS, you're not limited to one type of terminal. Our open systems enable integration with third-party software and hardware providers, so you're not locked in to buying from just one partner.

Go mobile with full POS functionality on a Windows® 8 tablet. This option provides a dependable, feature-rich, mobile experience for foodservice operators and service staff.
